LAMBDA LA 4001.091

Multipurpose chair of contemporary design. Thin and subtle construction provides extraordinary comfort of sitting. Functional shape, low weight and excellent stacking suggest easy manipulation making Lambda the perfect choice for large rooms. However, different color and upholstery options of the shell and several base designs suggest the chair for many other interior settings – from a coffee shop up a cozy home office.

Description	All-plastic shell made of polypropylene (PP) firmly attached to the base with four screws. Plastic cover on the lower side of the seat prevents from damage when stacking.
Base	.091 - Four-legged base with integrated armrests made of steel tubes 20 x 2 mm with joint-glides, black powder color finish. Plastic part of the armrest is slid onto the structure and secured with a screw. Material polypropylene (PP).
Plastic components	Standard colors: black, red, light grey, greyish blue, beige, olive green On request: Fire-resistance according to the norm UNI9177 – fire reaction class 1 - MOQ 200 pcs. The color of plastic parts depends on the color of the shell.
Stacking	Without trolley up to 6 pcs. With trolley up to 16 pcs.
Optional	• Base – RAL colors (red, light grey, greyish blue, pigeon blue, beige, olive green) • Other colors RAL – on request • Base – chrome finish • Transport trolley, stackability up to 16 pieces • Plastic glides with felt
